

Office Space: innovative & effective space heating

Customer brief

To refit the premises with a heating solution that looked nice and could cope with cold winters.

Background

The MD of Microscooters, and 'Business Woman of the Year 2009' moved her company into a boat builders shed and built a showroom and full set of executive offices.

The steel frame construction and linings, together with the location, presented a heating challenge as extreme cold filtered through the building in winter.

Solution

- Products recommended were ceiling mounted and wall mounted Far Infrared heating panels.
- Controlled by plug-in and wireless thermostats
- An area of 137 sq. m would be heated by 7.5 kW and operate for 6 hours per 24 hour day.
- A complete installation service using our staff and approved electrician was used.

Results

- ✓ Effective heating that keeps the challenging premises warm throughout the year
- ✓ Panels fit in with new-look offices
- ✓ Comfortable working environment
- ✓ Cost savings

“The heaters work perfectly maintaining a good office temperature even during the coldest snap in December. We are thrilled with this heating and the service received”. [See full testimonial.](#)
